## Projects

**Souled Store clone** | Newton School ([link](#))

October 2023 - November 2023

**Features:** Responsive UI, User Authentication, Product Catalog, Shopping Cart, Checkout Process, Order Management, Responsive Design, User Reviews and Ratings, Security, Admin Panel, Notifications.

**Technologies Used:** HTML, CSS, JavaScript, React.js, Bootstrap.

### Project Overview:

The Online Shopping Store is a web-based platform that allows users to explore a wide range of products, add them to their cart, and make secure online purchases. The platform aims to provide a seamless and enjoyable shopping experience for users.

### Description :

Join Us in the Exciting World of Online Shopping!

Discover the convenience of online shopping at SouledStor. Explore our diverse collection, enjoy exclusive offers, and experience the joy of finding what you need with just a few clicks. Welcome to a new era of e-commerce where quality, convenience, and customer satisfaction are at the forefront.

Start Shopping Now Create an Account Learn More About Our Services

**Features:** Responsive UI, Login/ Signup, create post, create page, view posts, upvote, downvote and comments on post

**Tech Stack :**HTML, CSS, JavaScript, React, Next.js, Bootstrap.

**Description:**

**Profile and Timeline:** Users create personal profiles where they share information about themselves and post updates. The timeline displays a chronological stream of these posts.

**Friendship Connections:** Users can connect with others by sending or receiving friend requests. Friendships are mutual, and once established, users can see each other's posts and updates.

**News Feed:** The News Feed is a central feature that displays a curated stream of updates from friends, pages, and groups that a user follows.

**Groups and Pages:** Users can join or create groups based on common interests, and businesses or individuals can create Pages for public entities.

**Messenger:** Facebook's integrated messaging platform allows users to chat with friends, share media, and make voice or video calls.

**Events:** Users can create, invite others to, and RSVP to events. This feature facilitates event planning and coordination.

**Privacy Settings:** Facebook provides customizable privacy settings, allowing users to control who sees their content and information.

**Features:** Responsive UI.

**Tech Stack :** HTML, CSS, JavaScript, React,Bootstrap.

**Description:** Pokemon HelpDesk is an exciting React.JS web application that offers a dynamic and interactive platform for exploring the world of Pokemon. With a basic Pokemon API implementation and a commitment to ongoing development, it aims to become the ultimate destination for Pokemon enthusiasts, providing comprehensive information and a range of useful features to enhance the user experience.

**Features:**

- Search Page
- History Page
- Meaning of any word

**Tech Stack Used:** HTML, CSS, JavaScript, Bootstrap.

**Role:** Developer.

**Description:** we all do reading and get confused with the meaning of some words so it would be helpful if we had an application where we search for words and get the meaning of words and a page where we could see all the searched words. The reason for the creation of this website is to make a platform where people can search for the specific words and it would save in search history to read them later .
